PROFESSIONAL SUMMARY

Full-Stack Web Developer with 1.5 years of production experience at Luxury Presence — delivered 500+ high-end real estate websites (150-200 drafts, 350+ revisions) at a sustained quota of 28-32 tasks/month. Beyond production delivery, identified systemic bottlenecks and shipped 3 internal tools adopted by the ~30-person web builder team, reducing manual work by 11+ cumulative hours daily. Proficient across the full stack: HTML/CSS/SCSS, JavaScript, React.js, Next.js on the frontend; Node.js, PHP, REST APIs, and MySQL/MongoDB on the backend. Experienced in integrating AI APIs (Google Gemini, OpenAI) as reasoning layers within production tools — not as shortcuts, but as solutions to problems that require semantic understanding (CSS conflict detection, metadata extraction, code optimization). Brings strong systems thinking, code quality judgment, and business communication skills often lacking in purely technical developers.

CORE COMPETENCIES

Frontend: HTML5, CSS3, SCSS, TailwindCSS, Bootstrap, JavaScript (ES6+), TypeScript, jQuery, Responsive Web Design, Cross-browser QA

Frameworks & CMS: React.js, Next.js, WordPress (Custom Themes & Plugins), Elementor, Sanity.io, Custom CMS, Component Architecture

Backend & APIs: PHP, Node.js, Express, RESTful APIs, Codelgniter, Laravel, OOP, MVC, Integrations (Google OAuth 2.0, YouTube V3, Vimeo, MLS/IDX)

Databases: MySQL, MongoDB, PostgreSQL, Supabase, SQL Optimization, Database Indexing, ERD

AI Integration: Gemini API, OpenAI API, Claude Code (production workflows, conflict detection, metadata reasoning)

Testing: Jest, Unit Testing, Integration Testing

Tools & DevOps: Git, GitHub, GitHub Actions (CI/CD), AWS (EC2, Lambda, Lightsail), Vercel, Cloudflare, Fly.io

CRM & Payment: HubSpot, Follow Up Boss, Stripe, Resend, Lead capture automation

PROFESSIONAL EXPERIENCE

Full-Stack Web Developer • Luxury Presence | Nov 2024 – Apr 2026

Built and maintained 500+ high-end real estate websites using HTML, CSS/SCSS, JavaScript, and a proprietary backend CMS; delivered at a sustained quota of 28-32 tasks/month (mix of initial builds and revisions). Consistently met tight production deadlines while maintaining state, brokerage, and brand compliance standards.

Identified three systemic bottlenecks within the high-quota environment and shipped AI-integrated tools adopted team-wide:

- **SEO Title Generator** – Automated extraction of SEO metadata from structured website templates, eliminating manual copywriting for each build. Adopted by the full team; saved approximately 11 cumulative hours of daily work across the entire team. Reduced per-site SEO setup time from ~20 min to ~2 min.

- [Vlog Migration Tool](#) – Integrated YouTube and Vimeo APIs to programmatically extract video metadata, embed links, and batch-migrate video content across client websites. Eliminated manual video scraping workflow entirely. Adopted by the full team; saved 1+ hour per 30 videos migrated. Later published as a public Chrome Web Store extension and standalone web app (vlog-tool.chavbuilds.com).
- [Enhanced Magic CSS](#) – Chrome extension combining live CSS inspection/editing with Gemini AI-powered conflict detection and auto-deduplication. Reduced technical debt and handoff friction in a high-velocity revision pipeline: subsequent builders inherited cleaner, deduplicated code, allowing faster iteration without debugging inherited CSS conflicts. Gemini's semantic understanding of CSS cascade/specificity was critical to safely suggesting conflict-aware cleanups in shared template environments. Adoption varied among senior builders with established workflows, but distributed to the full team; later published as a public Chrome Web Store extension and GitHub repo.

Applied responsive design principles, cross-browser compatibility testing, and SEO best practices across all production work. Worked closely with QA and content teams to ensure compliance and quality under strict delivery timelines.

EARLIER PROFESSIONAL EXPERIENCE

Data Classification Specialist • Adease Research Media Inc | Jun 2021 – Nov 2024

Maintained <1% monthly error rate across high-volume data classification and quality assurance work.

Cyberbacker (Part-time) • Cyberbacker Philippines | Mar 2022 – Jun 2022

Completed CRM database cleaning and mining project ahead of schedule within a 3-month contract.

Financial Advisor • Sun Life of Canada Philippines Inc. | Dec 2019 – Mar 2021

First on the team to close a life insurance sale in a fully remote setup during ECQ lockdowns; recognized for adaptability and initiative in challenging conditions.

GrabCar Operator / Driver • Grab Philippines | Dec 2016 – Oct 2020

Grew vehicle fleet from 2 to 12 cars; led team to top ranking in local Grab driver community. Awarded Grab-All-You-Can (among the first 10 drivers to complete 500 trips/month for 6 consecutive months).

Operations Supervisor • Entom Pest Control | Aug 2014 – Oct 2017

Streamlined scheduling and resource allocation, improving service delivery efficiency. Trained and supervised technicians on quality and safety standards.

Customer Service Representative • Convergys Philippines | Feb 2014 – Aug 2014

Provided personalized customer support for AT&T services; enhanced customer satisfaction and retention metrics.

EDUCATION & TRAINING

Village 88 Full-Stack Web Development Bootcamp | Jan 2024 – Apr 2024

JavaScript, Node.js, React, PHP, CodeIgniter 3, MySQL, MongoDB, REST APIs, MVC architecture, CI/CD principles. Completed 300+ assignments and 2 capstone projects.

BS Chemical Engineering • University of the Philippines Los Banos | Nov 2006 – Nov 2010

High School • Quezon City Science High School | Jul 2003 – May 2006
