PROFESSIONAL SUMMARY

Full-Stack Web Developer with 1.5 years of production experience at Luxury Presence — built and delivered 500+ high-end real estate websites (200+ drafts, 300+ revisions) and developed internal tools that saved the team 11+ hours daily. Proficient across the full stack: HTML/CSS/SCSS, JavaScript, React.js, Next.js on the frontend; Node.js, PHP, REST APIs, and MySQL/MongoDB on the backend. Goes beyond assigned tasks: designed and deployed two published Chrome extensions with integrated AI, an API-powered video migration tool, and an automated SEO generator — each adopted team-wide. Backed by 10+ years of cross-industry experience in operations, data, and client-facing roles, bringing business judgment and communication skills that most developers lack.

PROFESSIONAL EXPERIENCE

Website Builder • Luxury Presence

Nov 2024 - Apr 2026

- Built and maintained 500+ high-end real estate websites using HTML, CSS/SCSS, JavaScript, and a proprietary backend CMS; delivered at a sustained quota of 30-40 tasks/month (mix of initial builds and revisions). Consistently met tight production deadlines while maintaining state, brokerage, and brand compliance standards.
- Identified three systemic bottlenecks within the high-quota environment and shipped AI-integrated tools adopted team-wide:
 - **SEO Title Generator** – automated SEO title generation from structured metadata, saving ~11 hours of cumulative team time daily across 30 web builders
 - **Vlog Migration Tool** – Integrated YouTube and Vimeo APIs to programmatically extract video metadata, embed links, and batch-migrate video content across client websites. Eliminated manual video scraping workflow. Adopted by the full team; saved ~1+ hour per 30 videos migrated. Later published as a public [Chrome extension](#) and a standalone [web app](#).
 - **Enhanced Magic CSS** – [Chrome extension](#) for web builders to inspect, edit, and manage CSS/SCSS live across templates; features a live editor, element picker, CMS mode, and an integrated Gemini AI assistant for conflict-aware CSS suggestions.
- Applied responsive design principles, cross-browser compatibility, and SEO best practices across all builds.
- Worked closely with QA and content teams to ensure compliance with state, brokerage, and brand standards under strict delivery timelines.
