Professional Summary

Full-Stack Web Developer with production experience delivering WordPress and custom web builds for clients and agencies, including 1.5 years at Luxury Presence, where I delivered 500+ high-end real estate websites (150-200 drafts, 350+ revisions) at a sustained quota of 28-32 tasks/month. Currently building and owning WordPress + Elementor Pro projects end-to-end at Pinnacle Digital, an AI receptionist and revenue-recovery platform for service businesses, while working within GoHighLevel (GHL). Beyond production delivery, I identify systemic bottlenecks and ship AI-integrated internal tools; at Luxury Presence I shipped 3 tools adopted by the ~30-person web builder team, reducing manual work by 11+ cumulative hours daily. Proficient across the full stack: HTML/CSS/SCSS, JavaScript, React.js, Next.js on the frontend; Node.js, PHP, REST APIs, and MySQL/MongoDB on the backend. Experienced integrating AI APIs (Google Gemini, OpenAI) as reasoning layers within production tools. Brings strong systems thinking, code quality judgment, and business communication skills often lacking in purely technical developers.

Core Competencies

Frontend: HTML5, CSS3, SCSS, TailwindCSS, Bootstrap, JavaScript (ES6+), TypeScript, jQuery, Responsive Web Design, Cross-browser QA, Figma (pixel-perfect design-to-code conversion)

Frameworks & CMS: React.js, Next.js, WordPress (Custom Themes & Plugins), Elementor / Elementor Pro, WooCommerce, Sanity.io, Custom CMS, Component Architecture

Backend & APIs: PHP, Node.js, Express, RESTful APIs, CodeIgniter, Laravel, OOP, MVC, Integrations (Google OAuth 2.0, YouTube V3, Vimeo, MLS/IDX)

Databases: MySQL, MongoDB, PostgreSQL, Supabase, SQL Optimization, Database Indexing, ERD

AI Integration: Gemini API, OpenAI API, Claude Code (production workflows, conflict detection, metadata reasoning)

Testing: Jest, Unit Testing, Integration Testing

Tools & DevOps: Git, GitHub, GitHub Actions (CI/CD), AWS (EC2, Lambda, Lightsail), Vercel, Cloudflare, Fly.io

CRM & Marketing Automation: HubSpot, Follow Up Boss, GoHighLevel (GHL), Lead capture automation

Workflow Automation & Payments: n8n, Stripe, Resend

Professional Experience

AI-Assisted Fullstack Web Developer | Pinnacle Digital | Aug 2026 - Present

- Own WordPress website projects end-to-end, from build to launch, using WordPress and Elementor Pro
- Work within GoHighLevel (GHL) to build and maintain sites, funnels, and landing pages for Pinnacle Digital's AI receptionist / revenue-recovery product for service businesses
- Apply AI-assisted development workflows to accelerate build and revision speed on client-facing sites

Founder & Full-Stack Developer | Chavbuilds | May 2026 - Present

- Design and build production-grade real estate SaaS templates (Luxury Agent, Modern Team, Local Expert) on a shared design system, live at re-templates.chavbuilds.com
- Stack: Next.js, TailwindCSS, Sanity.io, Mapbox GL JS, Supabase, HubSpot, Resend
- Built a lead capture and conversion system routing every entry point (contact, valuation, showing, market report) into HubSpot CRM with automated Resend emails
- Integrated live MLS/IDX search, Supabase Auth for gated search, and third-party data (Census, Walk Score, Google Places) across all templates
- Positioned and priced the product as a faster, custom-coded alternative to WordPress and platforms like Luxury Presence for real estate agents

Full-Stack Web Developer | Luxury Presence | Nov 2024 - Apr 2026 (1.5 years)

- Built and maintained 500+ high-end real estate websites using HTML, CSS/SCSS, JavaScript, and proprietary backend CMS
- Delivered at sustained quota of 28-32 tasks/month (mix of initial builds and revisions)
- Consistently met tight production deadlines while maintaining state, brokerage, and brand compliance standards
- Built 150-200 initial website drafts and managed 350+ revision cycles
- **Identified three systemic bottlenecks and shipped AI-integrated tools adopted team-wide:**
 - SEO Title Generator: automated SEO metadata extraction, cutting per-site setup time from ~20 min to ~2 min; saved ~11 cumulative hours/day across the ~30-person team; adopted company-wide
 - Vlog Migration Tool: integrated YouTube/Vimeo APIs to batch-migrate video content, saving 1+ hour per 30 videos migrated; later published as a public Chrome Web Store extension and web app (vlog-tool.chavbuilds.com); adopted company-wide
 - Enhanced Magic CSS: Chrome extension combining live CSS inspection with Gemini AI-powered conflict detection and auto-deduplication, reducing technical debt in the revision pipeline; published as a public Chrome Web Store extension and GitHub repo; distributed to full team
- Applied responsive design and cross-browser compatibility testing, SEO best practices, and close collaboration with QA and content teams under strict delivery timelines

Earlier Professional Experience

Data Classification Specialist | Adease Research Media Inc | Jun 2021 - Nov 2024

- Maintained <1% monthly error rate across high-volume data classification and quality assurance work

Cyberbacker (Part-time) | Cyberbacker Philippines | Mar 2022 - Jun 2022

- Completed CRM database cleaning and mining project ahead of schedule within a 3-month contract

Financial Advisor | Sun Life of Canada Philippines Inc. | Dec 2019 - Mar 2021

- First on team to close a life insurance sale in a fully remote setup during ECQ lockdowns
- Recognized for adaptability and initiative in challenging conditions

GrabCar Operator / Driver | Grab Philippines | Dec 2016 - Oct 2020

- Grew vehicle fleet from 2 to 12 cars
- Led team to top ranking in local Grab driver community
- Awarded Grab-All-You-Can (among first 10 drivers to complete 500 trips/month for 6 consecutive months)

Operations Supervisor | Entom Pest Control | Aug 2014 - Oct 2017

- Streamlined scheduling and resource allocation, improving service delivery efficiency
- Trained and supervised technicians on quality and safety standards

Customer Service Representative | Convergys Philippines | Feb 2014 - Aug 2014

- Provided personalized customer support for AT&T services
- Enhanced customer satisfaction and retention metrics

Education & Training

Full-Stack Web Development Bootcamp | Village 88 | Jan 2024 - Apr 2024

- JavaScript, Node.js, React, PHP, CodeIgniter 3, MySQL, MongoDB, REST APIs, MVC architecture, CI/CD principles
- Completed 300+ assignments and 2 capstone projects

BS Chemical Engineering | University of the Philippines Los Banos | Nov 2006 - Nov 2010

High School | Quezon City Science High School | Jul 2003 - May 2006
